

Legal Risk Statement

This BHP project white paper is for reference only and may not rely on the statements in this article as a basis for making an investment decision. Bank of Hash Power Group does not make any representations or warranties, either expressed or implied, and does not assume all the responsibility arising from the information described in this white paper. Bank of Hash Power (BHP) Group does not accept any restrictions on any statements of BHP Token (BHPC) and future performance or rewards. Route map and Development mentioned in this white paper may be adjusted according to the operation result, and the actual result and performance of BHP may be different from the paper described. The publication or spread of this white paper does not mean that it applies to the laws and regulations or the relevant regulations in your area. This project is not for Chinese, South African, American citizens and area or countries where ICO is forbidden. But we can't judge from the digital wallet address. Please read the chapter of token's publication in detail to know the terms and conditions about Initial Coin Offering (ICO).

This document is used to convey information and the contents just only for reference. It is not the investment advice, intention or instigation. It is neither understood as providing any buying and selling behavior or any invitation to buy or sell any kinds of securities, nor the contract or promise of any form. Unless you know the development of BHP and the project information very well, we do not suggest you get the cryptocurrency. The users who has the willing need to know the risk of BHP firstly, once the investor participated in the investment and it means that he has promised to know and accept the risk and agreed to bear all the consequences or results personally. BHP Group does not promise to assume any direct or indirect loss of assets due to the participation in the project. Investors are not entitled to any legal liability to any member of the BHP project team.

The BHP project will look to comply with all Cayman Islands regulations and regulations of other jurisdictions that it is required to.

Legal Risks and Disclaimers

LEGAL CONSIDERATIONS, RISKS AND DISCLAIMER IMPORTANT NOTICE: PLEASE READ THE ENTIRETY OF THE "Legal Considerations, Risks and Disclaimer" SECTION CAREFULLY. WE RECOMMEND YOU CONSULT A LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR(S) OR EXPERTS FOR FURTHER GUIDANCE PRIOR TO PARTICIPATING IN THE BHPC TOKEN SALE OUTLINED IN THIS WHITE PAPER.

Please note that this is a summary of the legal considerations, risks and disclaimers document which can be found on <https://bhpcash.io> and which you must read in full: (i)

making use of this White Paper and all information available on the website(s) of BHP and/or (ii) participating in the token sale outlined in this White Paper (the “Token Sale”). Any undefined capitalized terms below shall have the meaning set out in the “Legal Considerations, Risks and Disclaimer” section.

The contents of the “Legal Considerations, Risks and Disclaimer” section outlines the terms and conditions applicable to you in connection with (i) your use of this White Paper and of any and all information available on the Website; and/or (ii) your participation in the Token Sale, in each case in addition to any other terms and conditions that we may publish from time to time relating to this White Paper, the Website and the Token Sale (such terms hereinafter referred to as the “Terms”).

The information set forth in the “Legal Considerations, Risks and Disclaimer” section may not be exhaustive and does not imply any elements of a contractual relationship. While we make every reasonable effort to ensure that all information: (i) in this White Paper; and (ii) available on the Website (all the information in the White Paper and all information available on the Website hereinafter referred to as the “Available Information”) is accurate and up to date, such material in no way constitutes professional advice.

The BHP Group does not recommend purchasing Tokens for speculative investment purposes. Tokens do not entitle you to any equity, governance, voting or similar right or entitlement in the BHP Group or in any of its affiliated companies. Tokens are sold as digital assets, similar to downloadable software, digital music and the like. The BHP Group does not recommend that you purchase Tokens unless you have prior experience with cryptographic tokens, blockchain-based software and distributed ledger technology and unless you have taken independent professional advice. Citizens, nationals, residents (tax or otherwise) and/or green card holders of each of: (i) the United States of America; (ii) Singapore; (iii) South Africa; (iv) the People’s Republic of China; or (v) any other jurisdiction which prohibits the possession, dissemination or communication of the available Information and/or prohibits participation in the Token Sale or the purchase of Tokens or any such similar activity or any other restricted persons are not permitted to participate in the Token Sale.

In no event shall the BHP Group or any current or former BHP Group Representatives be liable for the Excluded Liability Matters. The BHP Group does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in the available information. You should carefully consider and evaluate each of the risk factors and all other information contained in the terms before deciding to participate in the Token Sale.

LEGAL CONSIDERTIONS The BHP Group has approached the Token Sale in a

responsible and sensible manner. Given the uncertain and largely unregulated status of distributed ledger technologies, businesses and activities as well as cryptocurrencies and cryptocurrency-related businesses and activities, the BHP Group has spent a significant amount of time and resources to consider its business approach and where it proposes to operate now and in the future. The BHP Group will look to comply with all Cayman Islands regulations and regulations of other jurisdictions that it is required to. However, due to the current uncertain state of regulation across the world, the BHP Group cannot guarantee the legality of the BHP Group's business platform and/or its ability to develop, structure and licence any future Token functionality in every jurisdiction but the BHP Group will strive to be responsive and compliant in the face of any regulatory inquiry. The Tokens are functional utility tokens designed for the BHP Group's business platform. The Tokens are not securities. In the event that you purchase Tokens, your purchase cannot be refunded or exchanged. The BHP Group does not recommend purchasing Tokens for speculative investment purposes.

For the convenience of our customers and those of our affiliated companies already using the BHP Group's business platform, the Available Information will be available in a number of languages. The BHP Group's BHPC tokens described in this White Paper (the "Tokens") are not intended to constitute, and shall not constitute, securities in any jurisdiction. This White Paper does not constitute a prospectus or offer document of any sort and the available information is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction. The BHP Group does not provide any opinion or any advice to purchase, sell, or otherwise transact with tokens and the presentation, publication or communication of all or any part of the available information shall not form the basis of, or be relied upon in connection with, any contract or investment decision. No part of "Available Information" shall be construed as a commercial, legal, financial or tax advice concerning the token, token sale or any matter of the Project, of which all or any part of the available information relates. You should consult your own legal, financial, tax or other professional advisors on the available information to know that you may be liable for any indecisive financial risk of buying tokens.

Terms Change

In the event that any term or part of this Legal Consideration, the Risk and Disclaimers section is or becomes invalid, illegal or unenforceable, it shall be deemed to be minimally modified to be valid, legal and enforceable. If such a modification is not possible, the relevant terms or part of the terms shall be deemed deleted. Any amendment or deletion of a provision or provision under this section of "Legal Practices, Risks, and Disclaimers" shall not affect the validity and enforceability of the remaining portions of these "Legal Considerations, Risks and Disclaimers".

Representations and Warranties

This item does not make or claims to make any representations, warranties or representations about the truth, accuracy and completeness of any information, facts, accuracy or completeness of any entity or person in any form, including any representation, warranty or undertaking.

User Commitment and Guarantee

You represent and warrant (and shall be deemed to represent and warrant) to the BHP Group on the date of such access or on the latest date on which you retain possession of all or any part of the available information as follows:

- (a) you are over 18 (eighteen) years of age;
- (b) you agree and acknowledge that the Tokens do not constitute securities in any form in any jurisdiction;
- (c) you agree and acknowledge that the Available Information (including the White Paper and the Website) does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of the Available Information;
- (d) you agree and acknowledge that no regulatory authority has examined or approved of the Available Information, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of all or any part of the Available Information to you does not imply that the applicable laws, regulatory requirements or rules have been complied with;
- (e) you agree and acknowledge that the Available Information, the undertaking and/or the completion of the Token Sale, or future trading of the Tokens on any exchange or market (regulated, unregulated, or otherwise), shall not be construed, interpreted or deemed by you as an indication of the merits of the BHP Group, the Tokens, the Token Sale or the Available Information;
- (f) the distribution or dissemination of the Available Information any part thereof or any copy thereof, or acceptance of the same by you, is not prohibited or restricted by the applicable laws, regulations or rules in your jurisdiction, and where any restrictions in relation to possession are applicable, you have observed and complied with all such restrictions at your own expense and without liability to the BHP Group;
- (g) you agree and acknowledge that in the case where you wish to purchase any Tokens, the Tokens are not to be construed, interpreted, classified or treated as: any kind of currency or commodity; debentures, stocks or shares issued by any person or entity (whether the BHP Group or otherwise); rights, options or derivatives in respect of such debentures, stocks or shares; rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;

units in a collective investment scheme; units in a business trust; derivatives of units in a business trust;

(h) you are fully aware of and understand that you are not eligible to purchase any Tokens or access the Available Information if you are a citizen, national, resident (tax or otherwise) and/or green card holder of a Restricted Jurisdiction or if you are a Restricted Person;

(i) you have a basic degree of understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

(j) you are fully aware and understand that in the case where you wish to purchase any Tokens, there are risks associated with: the BHP Group and its business and operations; the Tokens; the Token Sale; and relying or acting on all or any part of the Available Information;

(k) you agree and acknowledge that the BHP Group is not liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise, arising out of or in connection with any acceptance of or reliance on the Available Information or any part thereof by you;

(l) all of the above representations and warranties are true, complete, accurate and not misleading from the time of your last access to and/or possession of the available information.

Risk Warning

These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of the BHP Group to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements. These factors include, amongst others:

(a) changes in political, social, economic and stock or cryptocurrency market conditions, and the regulatory environment in the countries in which the BHP Group conducts its business and operations;

(b) the risk that the BHP Group may be unable to execute or implement its business strategies and future plans;

(c) changes in interest rates and exchange rates of fiat currencies and cryptocurrencies;

(d) changes in the anticipated growth strategies and expected internal growth of the BHP Group;

(e) Changes in the conditions of competition in which the business is operating; (f) Changes in future capital requirements and availability of financing and financing to meet these needs;

(g) War or acts of international or domestic terrorism;

(h) Disastrous events and the effects of natural disasters;

- (i) Other factors beyond the exclusive control of the project team;
 - (j) Any risks and uncertainties relating to the Project and its business and operations, tokens, tokens and any part of the Company that relies on all or available information.
- These forward-looking statements apply only to the late white paper on the date of the release and the up-to-date date of the website, and nothing contained in the Available Information is or may be treated as a promise, statement or commitment to future performance or policy. Disclaims any obligation to update any of these forward-looking statements or to disclose any amendments to these forward-looking statements to reflect future developments, events or circumstances, even where new information is available or future events may occur.

Risk Factors

You should carefully consider and evaluate each of the following risk factors and all other information contained in these terms before deciding to participate in the Token Sale. It is materially and adversely affected that the uncertainties or significant risks develop into actual events, business, financial operating conditions and / or operating results, and the level of maintenance and use of tokens, if any of the following considerations apply. In this case, the token's trading price may be discount due to any of these considerations, uncertainties or significant risks and may lose all or part of the token or its economic value.

There is no prior market for Tokens and the Token Sale may not result in an active or liquid market for the Tokens. Prior to the Token Sale, there has been no public market for the Tokens. Although the BHP Group may seek the approval for availability of the Tokens for trading on a cryptocurrency exchange or market, there is no assurance that such approval will be obtained. Furthermore, even if such approval is granted by a cryptocurrency exchange, there is no assurance that an active or liquid trading market for the Tokens will develop, or if developed, will be sustained after the Tokens have been made available for trading on such market. There is also no assurance that the market price of the Tokens will not decline below the original or issue purchase price. The Purchase Price may not be indicative of the market price of the Tokens after they have been made available for trading on a market.

Tokens are not the currency of any central bank or country, supranational or quasi-national, nor are they backed by hard assets or other credit, nor are they the traditional meaning of the term commodity. This project is not responsible for nor does it undertake to pursue the circulation and trading of tokens on any market. Trading of Tokens will merely depend on the consensus on its value between the relevant market participants. No one is obliged to purchase any Token from any holder of the Token, including the purchasers, nor does anyone guarantee the liquidity or market price of Tokens to any extent at any time. to purchasers who are citizens, nationals, residents (tax or otherwise) and/or green card holders of Restricted Jurisdictions or to Restricted Persons or to

purchasers in any other jurisdiction where the purchase of Tokens may be in violation of applicable laws. Therefore, there can be no assurance that there will be any demand or market for the token, or the purchase price is an indication of the market price of the token exchanged or the market after any crypto-currency transaction.

Future sales or distribution of tokens may have a material adverse effect on the market price of tokens. Any future sale or distribution of tokens will increase the supply of tokens, which may result in downward pressure on token prices. The number of tokens (including but not limited to token sales) of important sales or distribution tokens other than those sold after the initial crowdsourcing, non-staffs issuing token buyers for purposes of community initiatives, business development, academic research, education and market expansion and issuance of Tokens as a reward to users of the Company's business platform or otherwise), or the perception that such further sales or issuance may occur, could adversely affect the trading price of the Tokens.

Negatively publicize the price of a token that could have a material adverse effect. This business platform token or any of the negative publicity team key personnel and / or distributed ledger technology regulators, cryptocurrencies and / or tokens in any jurisdiction may materially and adversely affect the market perception or market price of the Tokens, whether or not it is justified.

Business platform or any future token can not guarantee success. The value and demand of tokens depend to a large extent on the continued active participation of business platforms and users and the successful consideration of business lines. There is no guarantee that the business platform will benefit or continue to gain traction. In addition, no guarantee of future token functionality will be achieved. Although the project team has tried its best to provide a realistic estimate, there is no guarantee that the cryptocurrency raised in token sales is sufficient. For the above or any other reason, the development of the business platform and the expected launch of the token may not be completed or there is no guarantee that it will be launched.

The token's transaction price may fluctuate to a token sale. In general, the price of a cryptographic token tends to fluctuate relatively and can fluctuate significantly in a short period of time. For demand, the price tokens may fluctuate significantly and significantly at the appropriate market price, some of which are beyond the control of the project: new technological innovations; analysts' guesswork, advice, opinions or estimates on the token market or finance And operating results; changes in market valuations that make it possible for similar physical token price movements in the business to be on the same crypto-currency exchange or market tokens; to announce major events such as partnership, sponsorship or new product development; Fluctuations in market prices and trading volume of cryptocurrencies exchanges or markets; Increasing or decreasing key team members; Success or failure of management in implementing business and development strategies; Changes in general conditions affecting the blockchain or financial technology industry or Market

sentiment, or other events or factors.

Funds raised in token sales are exposed to theft. The team will make every effort to ensure that funds received from token sales are securely stored in a wallet and entered through a private key held by reputable parties. In addition, the project team makes every effort to ensure that the funds it receives from Token Sale will be securely guaranteed through the implementation of security measures. Despite this security measure, there is no guarantee that cryptocurrency will not be stolen as a result of hacking, sophisticated cyber attacks, distributed denial of service or errors, defects on Token's sales website, in smart contracts for wallet and token sales Rely on Ethereum blockchain or other blockchain or other means. These events may include, for example, defects in the programming or source code that cause them to be exploited or abused. In such cases, the project team may not receive the encrypted currency and the project team may not be able to use the funds to develop the project team's business platform and / or initiate any future token functions, even though the token sales are complete. In such cases, the introduction of the project's business platform and the future structure and licensing of tokens may be temporarily or permanently curtailed.

Any events or circumstances which adversely affect the project or any of its successor or affiliated operating entities may have a corresponding adverse effect on the project's business platform and/or on any future Token functionality, including but not limited to the development, structuring and launch of the project's business platform and of any future Token functionality. Such adverse effects would correspondingly have an impact on the utility, liquidity, and the trading price of the Tokens.

The project team's competitive financial technology and cryptocurrency industry have grown in strength over the past few years to evolve and evolve to meet new technological advances, change business models, change regulations and other factors. As a result of this ongoing project team may face operational difficulties to adapt to change, and the sustainability of the project team will depend on its ability to manage operations, ensure the availability of qualified and competent staff, and provide appropriate training to staff. As its business grows, the project team must also expand and adapt its operational infrastructure. The project team's business will rely in part on its blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technologies. All of these systems, tools, and skillsets represent complex, expensive and rapidly changing technology infrastructures. In order to demonstrate the ability to sustainably and effectively manage technology, supporting the project infrastructure of the business platform, the project team will need to continue to upgrade and improve its data systems and other operating system, programs and controls. These upgrades and improvements will require the dedication of resources and may or may not be controlled by computer services that are complex and increasingly dependent on third-party hosting by the project team.

Project teams may be adversely affected in their business, financial condition and / or business performance if they are unable to adapt their systems and organizations in a timely, efficient and cost-effective manner to adapt to changing circumstances. Third-party project teams may compromise the integrity and availability of internal information if it relies on services used by project teams that are affected by security breaches or other disruptions and may result in the loss of confidential or proprietary information and / or financial loss. Loss of financial, human or other resources and any other adverse effects that have a direct and adverse effect on the business, financial condition and / or operations of the project team Affect the ability of the project team to maintain or operate the project team business platform and / or to develop, Constructs and / or allows prospective future token functionality. Any adverse impact on the project team's business or technology may also be the price of utilities, liquidity, and token transactions.

Project team may experience system failures, unforeseen network or service disruptions, hardware or software defects, security holes, or other reasons that may adversely affect the project team's infrastructure network and / or the project team's business platform. The project team can not predict when a hacker attack, a cyberattack, a distribution denies a service or bug, vulnerability or flaw in the project team's business. In a smart contract on which the project team or project team's business platform relies, Or any other blockchain. Such events may include, for example, defective programming or source code that causes them to be exploited or abused. Project teams may not be able to detect such hacker attacks, cyber attacks, distributed denial of service errors or defects in a timely manner, and may not have sufficient resources to effectively cope with multiple service events simultaneously or continuously.

The project team's network or service, including the project team's business platform, may be disrupted by power disruption, power loss, or even disruption of its services such as disruption or unauthorized use of the software virus due to disruption to natural disasters, equipment failures, networks, and many other events of the user's attacks, some of which are beyond the control of the project team. cyber attacks, such as distributed denial, no guarantee of service, no future attempt, or the security of the project team will be effective. Project teams may be vulnerable to attacks on their infrastructure to steal information about their technology, financial data or user information or take other actions that harm the project team and / or tokens. Any material breach of the project team's behavioral or other security compromise compromises the availability, stability and security of the project team's business platform that could adversely affect the utility, liquidity and / or trading of price tokens. Suppliers of servers, bandwidth, locations and other services on which the project team depends may also be adversely affected by the economic conditions and can not guarantee that current economic conditions or deteriorating economic conditions or long-term or repeated economic downturns will not have a negative impact on the project The team business, financial position and operating results have

a material adverse effect.

The Project could continue to be affected by general global economic and market conditions. Challenging economic conditions worldwide have from time to time, contributed, and may continue to contribute, to slowdowns in the information technology industry at large. Weakness in the economy could have a negative effect on the Project's business, operations and financial condition, including decreases in revenue and operating cash flows, and inability to attract future equity and/or debt financing on commercially reasonable terms. Additionally, in a down-cycle economic environment, the Project may experience the negative effects of a slowdown in trading and usage of the Project's business platform and may delay or cancel the development, structuring, licensing and/or launch of the anticipated Token functionality.

Project teams or tokens may be affected by the new implementing regulations. Distributed ledger technologies, businesses and activities, as well as cryptocurrency-related businesses and activities are generally not regulated globally, but regulatory authorities in many different jurisdictions have been considering this issue to implement distributed ledger technology, regulation of businesses and affiliates Institutional activities as well as crypto-currency and cryptocurrency-related businesses and activities. The project team or tokens may be subject to new promulgation of the relevant distribution ordinance, businesses and activities, as well as businesses and activities related to cryptocurrencies and cryptocurrencies, including having to take steps to comply with these requirements or having to deal with inquiries from regulatory authorities, Notifications, requests, or enforcement actions can be costly and may require significant modifications to the project team's business platform and / or expected token functionality. This may affect the appeal or availability of the business platform and / or the project team's business platform and / or expected feature token functionality for the user and lead to the use and demand of the project team to reduce the business platform and tokens. In addition, the new enforcement of costs (financial or otherwise) that should be complied with has exceeded certain thresholds and maintained the interest of the project team. Commercial platforms and / or developing, building, licensing and / or initiating future token functions may not Again, it is commercially viable and the project team may choose to discontinue the functional project team's business platform, prospective future token functionality, and / or token.

In addition, it is difficult to predict how or if government or regulatory agencies may or may not modify the laws and regulations that affect distributed ledger technology, including the project team's business platform, foreseeable future token capabilities, and / or tokens. The project team may also have to cease to operate such jurisdiction within an unlawfully operated jurisdiction or to make it commercially viable or undesirable to obtain the necessary regulatory approval to operate within such jurisdiction. In the above scenario, there is a risk of unforeseen risks from the token.

In addition to the risks included in the discussion of the above risk factors, there are other risks associated with you purchasing, holding and using tokens, including tokens that the project team can not expect. Such risks may further manifest as unintended changes or combinations of these risks.

Privacy Policy

You must provide your personal data account with participation in the BHP program registration by purchasing a token, you consent to the submission of your personal data to the Platform, which expressly authorizes BHP to store, process, use and transmit the information required to execute this Agreement to third parties . Whether or not it is identified from the information; or from those and other information We have or probably have the right to access, including from time to time, information in our records, and any other information relating to any individual You may from time to time, Provided to us in the interaction. The personal information you provide will be used to identify you as a BHP holder or to enforce this agreement. The platform promises to protect your personal information, your email address and other personal information is not shared with the public (for example, by placing it on any external list or sold to any third party) for disclosure only if it is necessary to enforce this Agreement or Except as required by this Agreement or applicable jurisdictions.

BHP may, at its sole discretion, decide whether to adopt a separate privacy policy or not and you must agree to this Privacy Policy.

Force Majeure

BHP assumes no responsibility for delay, non-performance, or interruption. Any reasonable or unreasonable service that results, directly or indirectly, from any cause or circumstance, including, but not limited to, any delay or failure caused by God's actions, civil or military authority Acts of terrorism, terrorism, civil strife, war, strikes or other labor disputes, fire, Internet service or interruption of Internet service providers, equipment and / or software failures, other calamities or any other disaster beyond our reasonable control, Shall not affect the enforceability of any remaining provisions of its validity.
